

Accomplished Network Engineer with over 7 years of experience in designing, configuring, and troubleshooting complex network environments. Expertise includes Cisco IOS, routing protocols (BGP, OSPF), VLANs, Ethernet/WAN circuits, and RAD hardware. Proven ability to diagnose and resolve service-affecting issues, managing escalations to resolution. Skilled in collaborating with teams and serving as a primary technical point of contact for clients, ensuring clear communication and successful network integrations.

WORK EXPERIENCE

Network Engineer

RAD Data Communications

Mahwah

10/2023 – 11/2025

Integrated RAD hardware with multi-vendor network environments, including Ciena and Cisco equipment, across 50-100+ client sites.

Served as a subject matter expert for the Megaplex-4100 series and Megaplex-1, providing advanced configuration and support.

Configured and supported ETX-205, ETX-203, ETX-205A, and legacy RAD products, including the MP-2100 series.

Provided expert-level management of AirMux wireless solutions, encompassing advanced configuration and troubleshooting for client sites.

Engineered and deployed Ethernet/WAN circuit solutions tailored to enterprise client network requirements.

Diagnosed and resolved network outages and service-affecting issues, managing escalations to completion for a large client portfolio.

Collaborated with a team of over 6 engineers on network planning, design, and deployment initiatives.

Acted as the primary technical liaison for clients, translating complex network challenges into actionable resolution plans.

Repair Technician II

Firstlight Fiber – Internet Service Provider

Victor

01/2022 – 10/2023

Investigated, documented, and diagnosed trouble calls to resolve service-affecting issues across DSL, T1, Carrier Ethernet, and Internet services.

Troubleshoot network events and outages on equipment including IP routers, Ethernet switches, and Optical Network Terminals (ONT – Ciena/Telco/Calix).

Managed trouble tickets from creation through escalation and resolution tracking within the ticketing system.

Oversaw and participated in network maintenance activities, ensuring timely customer communication and confirming service restoration post-maintenance.

Technical Support Associate II

Wyrestorm – Professional AV Solution Provider

Malta

01/2021 – 01/2022

Investigated and resolved service-affecting issues with Wyrestorm HDBaseT products utilizing diagnostic tools such as Wireshark and TeamViewer.

Provided remote assistance to installers with network configurations, including multicast and IP scheme settings, to ensure optimal product functionality.

Established lab environments to accurately replicate and document customer-reported bugs and software issues.

Executed firmware upgrades and factory resets on physical hardware components.

Mentored new technical support staff and contributed to system design and sales referral processes.

Programmer / Installer

Xssentials – Smart Home Automation

Avon

01/2017 – 01/2020

Installed and configured a range of networking equipment, including routers, switches, firewalls, WLCs, and servers.

Trained and supervised junior technicians during installation projects.

Programmed Savant Systems smart home equipment, Universal Remote Controllers, and WinPak access control systems.

Installed and programmed Panasonic IP and digital phone systems for both residential and commercial clients.

Implemented and configured high-end sound systems and home theater setups, ensuring meticulous rack wiring and cable management.

After Hours Trouble Resolution Specialist II

EarthLink Business – Internet Service Provider

Rochester

01/2014 – 01/2015

Resolved after-hours network trouble calls, configuring spanning tree, VLAN trunking, and managing firmware updates via FTP.

Independently assessed network issues and dispatched field technicians for on-site resolution.

Executed Hyperion ESSBASE cube restores and prioritized overflow workload based on customer urgency.

Mentored new staff while remotely developing skills through collaboration with senior team members.

Database & Security Co-op

Wegmans Food Markets – DBA & Security Co-op

Rochester

01/2013 – 03/2013

Supported database user management and security across Oracle, Microsoft SQL Server, Informix, and Netezza DBMSs on Windows/Unix environments.

Configured Microsoft SQL Server backup solutions for production, certification, and test servers (2008R2/2012).

Authored co-op documentation on SharePoint using OneNote, led documentation meetings, and provided peer training.

Computer Technician

Albany Medical Center

Albany

06/2012 – 08/2012

Trained nursing staff on new password management software and performed basic IT troubleshooting.

Network Systems Technician

Questar III – Educational & Administrative Services

Castleton

01/2008 – 01/2008

Deployed PCs utilizing ghost imaging with standardized configurations and managed inventory.

EDUCATION

- B.S. - Information Security and Forensics**
Rochester Institute of Technology
Rochester
..... Achieved High Honors.

01/2012 – 12/2014
- A.S. - Computer Information Systems**
Hudson Valley Community College
Troy
..... Received Academic Honors.

2010 – 12/2012
- Network Essentials & Intro to Networking (Cisco-sponsored) - Network Essentials & Intro to Networking (Cisco-sponsored)**
Columbia Greene Community College
Hudson
..... Relevant Coursework: System Administration, Network Services, Routing & Switching, Cryptography & Authentication, Discrete Math I & II, UNIX OS, Intro to Computer Malware, Wireless Networks, Network Security Auditing, Computer Security Policies, Cyber Self Defense, OS Scripting, Ethics in IT.

01/2019 – 12/2019
